Betaine Salicylate (BHA)

TECHNICAL DATA SHEET

Description: Betaine Salicylate combines perfectly the benefits of salicylic acid with the unique and gentle skin improvement properties, an oil-soluble exfoliator that penetrates into the deeper layer of the skin, BHA is more effective than AHA as it helps to remove the uppermost layer of the epidermis. The removal of damaged and dead skin cells on the skin's surface encourages the growth of new and healthy skin cells. It can improve skin conditions widely, and that has antimicrobial properties and exfoliating, moisturizing function.

Features: White crystal powder

Soluble: Soluble in Oil

Benefits:

Natural moisturizer, Gentle exfoliant, Skin smoothing agent, Antimicrobial, Keratolytic, Antiacne, Antimicrobials

Properties:

Anti-acne and anti-microbial

Exfoliation applications with anti-Irritation claims leave-on and rinse-off applications

Leave-on and Rinse-off Applications

INCI name: Betaine Salicylate

Cosmetic grade, CAS: 17671-53-3

For used as an active ingredients

Typical Application: Exfoliant ,Preservative, Antimicrobial

Typical use level: 0.5%-4.0%

Standard Packing: 1kg/20kg/Package

Shelf Life: 2 years

Quality System: Manufacture according to quality system
registered to ISO 9001:2008
