

Technical Data Sheet

Ceramide AP

Product Information

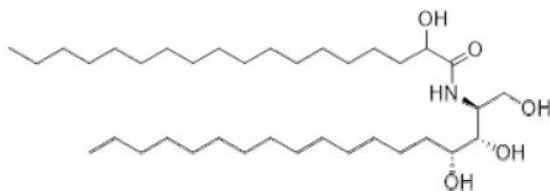

INCI: Ceramide AP

CAS: 2212070-45-6

Appearance: White to off-white
crystalline powder

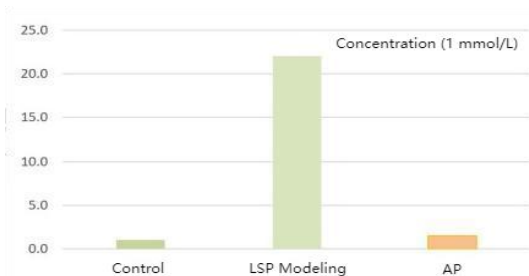

Purity: $\geq 90\%$

Chemical Structure:

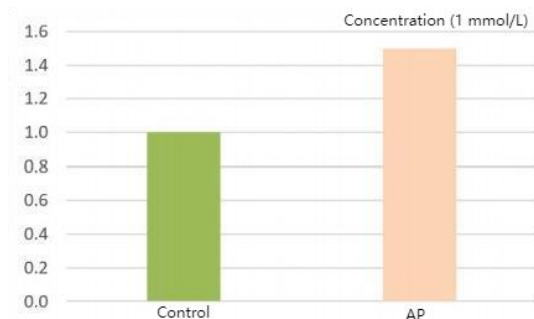

In Vitro Efficacy Experiments

Ceramide AP has anti-inflammatory effects

Ceramide AP has significant moisturizing effects

Function

Skin Barrier Repair and Protection

Ceramide NP is essential for maintaining the skin's lipid barrier, which prevents moisture loss and protects against external irritants, pollutants, and pathogens.

It helps restore the barrier in compromised or damaged skin, making it especially beneficial for dry, sensitive, or irritated skin.

Moisture Retention

It helps to lock in moisture by forming a protective layer that prevents dehydration. This keeps the skin hydrated, soft, and plump.

Anti-Aging Effects

By improving the skin's barrier function, Ceramide AP helps to reduce the appearance of fine lines and wrinkles, preventing premature aging signs caused by moisture loss and external aggressors.

Use

Products for repairing, moisturizing, barrier strengthening, and increasing scalp vitality, etc.

Packing & Storage

Standard packaging: 1kg/package

Shelf life: 36 months

Storage conditions: Keep sealed and protected from light

Recommended Dosage

0.05–0.2%
