Ceramide EOP

Product Information

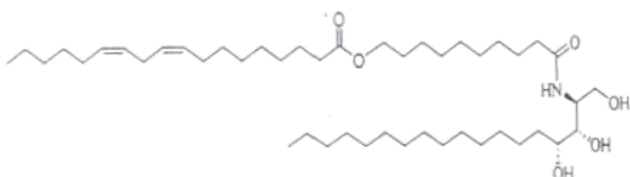

INCI : Ceramide EOP

CAS. : 100403-19-8

Appearance: White to off-white crystalline powder

Purity: ≥90%

Structure:

Function

Repair the Skin Barrier:

Ceramide EOP helps restore a damaged skin barrier, improving its ability to protect the skin from environmental aggressors and prevent water loss.

Moisturizing Effect:

It helps retain moisture in the skin, enhancing hydration and leaving the skin soft, smooth, and nourished.

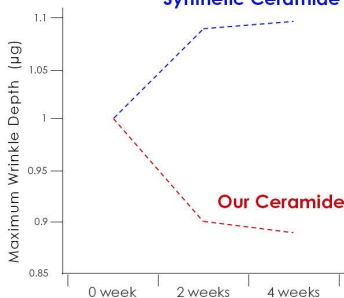

Anti-Aging:

By strengthening the skin barrier and reducing moisture loss, Ceramide EOP helps slow down the aging process, improving skin elasticity and firmness.

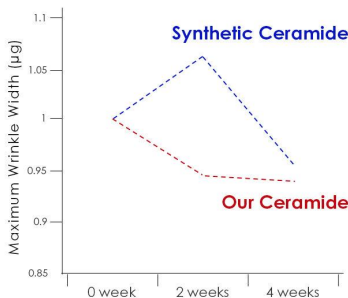

In vitro Efficacy Experiment

Based on 21-subject Skin efficacy results from 28 day clinical trials

Synthetic Ceramide

Synthetic Ceramide

Improved barrier function will help you achieve healthy skin and can help to resolve many skin problems. We pursue the path of maximum luxury with simple formulas that are based on the belief of Japanese minimalism. Below is data from our clinical trials.
